## EDUCATION

### Ajay Kumar Garg Engineering College

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.01/10

Ghaziabad, Uttar Pradesh

2024 – 2028

### The Sunrise Public School

CBSE Class XII, 82%

Jaunpur, Uttar Pradesh

2024

### Maa Durgaji Vidyalaya

CBSE Class X, 92%

Jaunpur, Uttar Pradesh

2022

## TECHNICAL SKILLS

**Programming Languages:** C++, Python, JavaScript, SQL, HTML, CSS

**Frameworks & Technologies:** Flask, Node.js, Express.js, React.js, REST APIs

**Machine Learning:** Scikit-learn, Pandas, NumPy, Matplotlib, Data Preprocessing, Feature Engineering

**Databases:** PostgreSQL, Prisma ORM

**Developer Tools:** Git, GitHub, VS Code, Postman, Docker

## PROJECTS

### WattWise – Smart Electricity Prediction | Python, Flask, Scikit-learn, Pandas, HTML/CSS

Jul 2026

- Built an end-to-end machine learning application to predict household electricity consumption and monthly electricity bills.
- Performed data preprocessing, feature engineering, and model training using Scikit-learn.
- Developed a Flask-based web interface for real-time predictions based on user inputs.
- Integrated weather, appliance usage, and household characteristics to improve prediction accuracy.

### Hospital Service Price Comparison Platform | Node.js, Express.js, Prisma, PostgreSQL

Jan 2026-present

- Developing a backend platform to compare prices of healthcare services across multiple hospitals.
- Designed RESTful APIs using Express.js and managed database operations with Prisma ORM and PostgreSQL.
- Implemented scalable database schema and modular backend architecture for maintainability.
- Focused on efficient data management and API performance for healthcare service listings.

### Fake Instagram Profile Detection | Python, Flask, Scikit-learn, HTML/CSS

Aug 2025

- Built a machine learning model to classify Instagram profiles as genuine or fake.
- Performed data preprocessing, feature scaling, model training, and evaluation using Scikit-learn.
- Developed a Flask web application to provide real-time predictions through an interactive interface.
- Improved understanding of supervised machine learning workflows and model deployment.

## ACHIEVEMENTS

- Solved **240+** Data Structures and Algorithms problems on **LeetCode**.
- Solved **120+** competitive programming problems on **Codeforces**.
- Built and deployed multiple Machine Learning and Full-Stack projects using Python, Flask, Node.js, Express.js, and PostgreSQL.

## RELEVANT COURSEWORK

- Data Structures and Algorithms
- Object-Oriented Programming
- Database Management Systems
- Operating Systems
- Computer Networks
- Machine Learning
