Professional Summary

Computer Science Engineering student at AKGEC with strong foundations in Data Structures & Algorithms, Machine Learning, and Software Development. Solved 200+ LeetCode problems and built machine learning projects. Currently developing a Hospital Service Price Comparison Platform.

Education

Ajay Kumar Garg Engineering College (AKGEC), Ghaziabad

B.Tech – Computer Science & Engineering

Expected Graduation: 2028 | CGPA: 8.2

Technical Skills

Languages: C++, Python, SQL

Core CS: DSA, OOPs, DBMS, Operating Systems

ML: NumPy, Pandas, Scikit-Learn

Web: Flask, HTML, CSS

Tools: Git, GitHub, VS Code

Projects

Hospital Service Price Comparison Platform (In Progress)

- Building a platform to compare hospital service prices.
- Designing scalable database architecture using Prisma ORM.
- Implementing search, filtering, and comparison features.

Fake Instagram Profile Detection

- Developed a machine learning model to identify fake Instagram profiles.
- Built a Flask web application for real-time predictions.
- Deployed the project for public access and testing.

Amazon Clone

- Developed a responsive Amazon-inspired landing page using HTML and CSS.

Coding Profiles & Achievements

- Solved 200+ LeetCode problems.
- Active Competitive Programmer on Codeforces.
- Strong problem-solving skills in DSA and C++.
- Built ML and software development projects independently.
